| Total | 774 | 525 | 799 | 387 | 277 | 340 | 1161 | 802 | 1139 |

LEGEND

MSM = Men who have sex with men; **IDU** = Injecting drug use; **HEMO** = Hemophilia/coagulation disorder;
HETERO = Heterosexual contact w/partner at risk/or with HIV; **TRANS** = Receipt of blood, components, or tissue;
OTHER = Reported when adult but perinatal infected; **NIR** = Risk not reported or identified.

⁽¹⁾ This new category created by CDC, is to support the ability to record an ethnicity and multiple races for an individual, necessitated by new federal OMB guidelines for reporting race and ethnicity.

NOTE:

All data at the local level is considered provisional and subject to edit checks by state and federal agencies. Adjustments are performed on a monthly basis to compensate for duplicate reports state wide and case validation projects.

MDCHD-HIV/AIDS Surveillance
Reported HIV (regardless of AIDS status) cases.

HIV (regardless of AIDS status) cases by Age Group, Year and Sex ⁽¹⁾

OTHER = Reported when adult but perinatal infected; **NIR** = Risk not reported or identified.

⁽¹⁾ In order to provide consistent HIV data over time, HIV data includes those cases that have converted to AIDS. These will be referred to as HIV (regardless of AIDS status) cases. These HIV cases can not be added to AIDS cases to get combined totals since the categories are not mutually exclusive. Cumulative HIV data will still be reported as before. These will be referred to as HIV (not AIDS) cases.

⁽²⁾ This new category created by CDC, is to support the ability to record an ethnicity and multiple races for an individual, necessitated by new federal OMB guidelines for reporting race and ethnicity.
